8. Research Approval Workflow
9. Notifications and Feedback
10. Account and Password Management
11. Troubleshooting
12. Security and Good Practice

Purpose of this manual

This manual explains how to use the CSU Aparri Fisheries Research Repository. It covers the complete journey from signing in and submitting a research paper to instructor review, administrator approval, and publication in the repository.

> **Interface note:** On a phone or tablet, open the menu button in the top bar to access role-specific pages. On a desktop, use the sidebar. Some dashboard tabs are shown directly on larger screens and as sidebar shortcuts on mobile.

1. About the System

The repository stores and presents fisheries research produced within CSU Aparri. It supports controlled submission, academic review, publication, discovery, visibility management, and basic engagement statistics.

Main capabilities

- Browse approved public research without signing in.
- Search by title, author, abstract, year, or keyword.
- Upload research through a guided, multi-step student form.
- Route submitted work to the selected instructor for review.
- Record comments, revision requests, approvals, and rejections.
- Send instructor-approved papers to the administrator for final review.
- Publish administrator-approved work to the repository.
- Manage users, imports, visibility, audit information, and backups.
- Bookmark research for later access.

2. Roles and Access

Role	Main access	Key restrictions
Guest	Browse, search, and view public approved research.	Cannot submit, review, manage, or bookmark papers.
Student	Submit research, track status, receive feedback, view the Rejection Bin, and bookmark papers.	Cannot approve papers or manage users.
Instructor	Review assigned papers, comment, request revisions, approve or reject, and browse the repository.	Cannot perform final publication approval.
Administrator	Final research review, user management, student import, visibility control, analytics, audit logs, and backups.	Administrative actions should be performed only after verifying the selected record.

3. Getting Started

Sign in

1. Open the repository website and select **Login**.
2. Enter either your assigned **User ID** or registered email address.
3. Enter your password, then select **Sign In**.
4. The system opens the dashboard for your assigned role.

> **Imported student accounts:** Use the User ID and temporary password delivered to the email address supplied during import. Change the temporary password after the first successful sign-in.

Forgot password

1. On the login page, select **Forgot password?**.
2. Enter the registered email address.
3. Select **Send Reset Link** and follow the instructions shown.
4. If no message arrives, check the spam folder or contact the system administrator.

Navigation

- **Desktop:** Use the left sidebar. Select the arrow on the sidebar edge to collapse or expand it.
- **Mobile:** Select the menu icon in the top-right corner, then select a page.
- **Repository:** Opens the searchable research collection.
- **Manage Account:** Shows account details and the password change form.
- **Logout:** Ends the current session and returns to the landing page.

4. Public Repository

Browse and search

1. Open **Browse Repository** from the landing page or select **Repository** in the sidebar.
2. Enter a title, author, keyword, or phrase in the search field.
3. Optionally filter the results by year or keyword.
4. Select **View Details** on a paper to open its full record.

Repository sections

- **Browse All:** Displays the full collection available to the current visitor.
- **Trending:** Orders research by views.
- **Most Downloaded:** Highlights frequently downloaded papers.

Visibility rules

Visibility	Who can view it
Public	Guests and all registered users, after approval.
Private	Registered users with repository access; hidden from guests.

> Signed-in users can select the bookmark icon on a research card. Saved items appear in the **Bookmarks** section of their dashboard.

5. Student Guide

Upload new research

1. Sign in as a student and open **My Research Dashboard**.
2. Select **Upload New Research**.
3. Upload the research PDF. Confirm the displayed file name and size.
4. Add each author. Supply the required author information before continuing.
5. Add research keywords that accurately describe the paper.
6. Select the applicable United Nations Sustainable Development Goals (SDGs).
7. Enter the title, abstract, course or program, and select the research adviser.
8. Choose **Public** or **Private** visibility.
9. Review all entered information, then select **Submit to Instructor for Review**.

> **Before submitting:** Verify spelling, author order, title, abstract, adviser selection, keywords, SDGs, visibility, and the uploaded PDF. The selected adviser receives the review notification.

Track a submission

Open **My Submissions** to view each paper, its status, submission date, visibility, adviser, and available actions. Select a paper to read the full feedback history.

Respond to a revision request

1. Open the paper from **My Submissions** or the related notification.
2. Read all instructor feedback and requested corrections.
3. Select the available edit or resubmit action.
4. Replace or correct the affected information and verify the revised paper.
5. Submit the revision for another instructor review.

Rejection Bin

Papers rejected during review appear in the **Rejection Bin**. Open a record to read the rejection reason and feedback. A rejected submission does not continue to the next approval stage unless a corrected paper is submitted again.

Notifications

The notification area reports review decisions and workflow updates. Unread items are marked, and the mobile header displays an unread count. Open a notification to review the associated paper and feedback.

6. Instructor Guide

Open assigned research

1. Sign in as an instructor.
2. Open **Review Research** from the sidebar.
3. Locate a paper assigned to you and select its review or view action.
4. Review the metadata, PDF information, authors, keywords, SDGs, and existing comments.

Add feedback

1. Open the paper's review details.
2. Select the feedback type: general feedback, revision request, or approval comment.
3. Write a clear, specific comment with the correction or recommendation.
4. Submit the comment so it becomes part of the paper's review history.

Make a review decision

Decision	Result
Request Revision	The student receives feedback and may correct and resubmit the paper.
Approve	The student is notified. The approved work can proceed to the administrator's final review stage.
Reject	The student is notified and the workflow stops at instructor review. The rejected paper appears in the student's Rejection Bin.

> Always add a useful explanation before requesting revision or rejecting a paper. Feedback should identify what must change and should avoid vague statements.

Other instructor tools

- Use **Notifications** to find newly assigned work and status updates.
- Use **Repository** to browse approved papers.
- Use **Bookmarks** to return to saved research.

7. Administrator Guide

Dashboard and analytics

The administrator dashboard summarizes users, students, instructors, submissions, approvals, status distribution, views, downloads, and keyword trends. Use these figures for monitoring; open the underlying records before taking an administrative action.

Final research review

1. Open **Research Submissions**.
2. Review papers marked as awaiting administrator review or upload requested.
3. Select **View** and verify the full record, instructor decision, metadata, and feedback.
4. Select **Approve** when the paper is ready for publication.
5. To reject, select **Reject**, enter a clear reason, and confirm the decision.

> **Administrative caution:** Approval publishes the research to the repository. Rejection sends the entered reason to the student. Confirm the paper title and author before completing either action.

Manage users

Open **Manage Users** to find user accounts. Depending on the available action, an administrator can update account information, activate or deactivate access, and change eligible user roles. Verify the user's identity before changing access or role.

Import students from Excel or CSV

1. Open **Import Students** from the administrator sidebar.
2. Select **Download Excel Template**.
4. Drag the file into the upload area or select the area to choose a file.
5. Review the preview. Correct rows marked as invalid.
6. Start the import and wait for the completion summary.
7. Review the totals for created accounts, skipped duplicates, and failed credential emails.

Column	Guidance
`Name`	Student's complete name.
`Email`	Valid email address used for credential delivery.
`Student_ID`	Unique student or user ID.
`Department`	Student department.
`Course`	Course or degree program.
`Year Level`	Current year level.

> The import creates a secure 10-character temporary password for each valid, non-duplicate account. Duplicate email addresses or Student IDs are skipped. Credential email delivery uses the configured email service.

Administrator Tools, Continued

Visibility management

1. Open the **Visibility** section.
2. Search for a paper or filter by current visibility or SDG.
3. Select the visibility action for the correct paper.
4. Review the confirmation message and confirm the change.

8. Research Approval Workflow

Student submission → Instructor review → Administrator review → Repository publication

Status	Meaning	Next action
Pending Review	Submitted and waiting for instructor review.	Instructor reviews the paper.
Under Revision	Corrections were requested.	Student revises and resubmits.
Instructor Approved	The instructor completed and approved the academic review.	Proceed to administrator review.
Instructor Rejected	The instructor rejected the submission.	Workflow ends; student reviews feedback.
Upload Requested	Instructor-approved paper is awaiting final administrator action.	Administrator approves or rejects.
Approved	Final review passed.	Paper is available in the repository according to visibility.
Rejected	The administrator rejected publication.	Student reviews the rejection reason.

9. Notifications and Feedback

- Notifications are addressed to a specific account.
- Unread notifications are visually distinguished from read items.
- Selecting a notification may open the relevant paper or dashboard section.
- Review comments remain associated with the research record.
- Rejection reasons should be complete enough for the recipient to understand the decision.

Recommended feedback format

> **Section:** Identify the chapter, page, table, or metadata field.
> **Issue:** Explain what is incorrect, incomplete, or unclear.
> **Required action:** State the correction needed before the next review.

10. Account and Password Management

1. Open the sidebar and select **Manage Account**.
2. Review the displayed name, User ID, and role.
3. Enter the current password.
4. Enter a new password of at least six characters.
5. Repeat the new password and select **Save New Password**.

> Never share passwords through chat, social media, or an unverified email request. Administrators should not ask users to disclose their current password.

11. Troubleshooting

Problem	What to do
Sign-in fails	Check capitalization, remove accidental spaces, try the registered email or User ID, and confirm the account is active.
Temporary password email is missing	Check spam, verify the imported email address, and ask the administrator to review the import delivery summary.
Upload cannot continue	Complete every required field, select an adviser, and verify the chosen file and entered.
Research is not visible to guests	Confirm that the status is Approved and visibility is Public.
Import row is rejected	Verify Name, Email, and StudentID, then check whether the email or ID already exists.
Mobile navigation is missing	Select the menu icon in the top bar to open the role-specific sidebar.

12. Security and Good Practice

- Use only your own assigned account.
- Change temporary passwords promptly.
- Review the selected paper and user before any approval, rejection, role change, or restore.
- Use clear academic language in all comments and rejection reasons.
- Do not upload confidential personal data that is not required for the research record.
- Log out when using a shared or public computer.
- Report incorrect permissions, suspicious activity, or unexpected data changes to the administrator.

Support information

For account activation, incorrect role assignment, missing credential emails, or access problems, contact the designated CSU Aparri Fisheries Research Repository administrator. Include your name, User ID, role, and a short description of the issue. Do not include your password.
